GT SERIES 19" SIDE BRACKET APPARATUS

Side brackets ; are the most frequently used accessories within GT series cabinets. They distribute the load to the vertical profiles in a balanced manner and 19" equipments may be attached between them when they are installed one under the other with 10U spacing.

They may be attached throughout the depth of the cabinet between two vertical profiles.

Numbers of the pieces provided with the standard cabinet configurations may be increased on order or later during installation.

By means of readily present side brackets on the cabinet or by means of the ones added afterwards, any device of desired U value may be attached vertically, easily at the sides of the cabinet.
