

# WT SERIES ECO WALL TYPE CABINET

## WTE WALL TYPE CABINET GENERAL FEATURES

STANDARDS AND COMPLIANCES
ISO9001:2008 Quality Management System
IEC 297-1, 19" mounting standard
IEC 297-2, Overall cabinet dimensions
TS EN 61587-1 Standard.
Environment Friendly
%100 recyclable.
  

### ECONOMIC SOLUTION

WT Series Eco Wall Type Cabinets are **low cost** wall type network cabinets.

### DECORATIVE APPEARANCE

Colored strips located at the sides of the 4mm, antistatic, tempered, smoothed glass door having an extruded aluminum frame and high fracture resistance present a decorative view.

### DIVERSE OPTIONS OF DEPTH AND HEIGHT

They meet all kinds of requirements of wall type networks with 2 different depth and 5 different U height options.

### GROUND CONTACT

In free standing type applications, they may be used with optional pinion feet or caster group.

## ACTIVE/PASSIVE VENTILATION

By attaching ventilation module with 2 fans maximum to the ventilation hole at the upper chassis of the cabinet, active ventilation is achieved.

If no fan module is attached, these ventilation holes enable air circulation inside the cabinet and discharging of the hot air by passive ventilation.

## FIXED SIDE DOORS

Since the side doors are **fixed** and not detachable, access to the cabinet is ensured only from the front in wall mounting applications and from the back and the front in free standing applications.

## ADJUSTABLE DEPTH DEVICE INSTALLATION RAILS

Standard cabinet is delivered having 1 set and 2 device installation rails mounted thereon. Device installation rails enable the depth adjustments of the devices to be applied into the cabinet.

## MULTI DIRECTIONAL CABLE INLET

By means of 145mm x 70mm cable inlet holes at the upper, lower and rear door of the cabinet, it provides cable inlet at **3 directions** which in turn facilitates installation.

## SAFE CABLE INLET

Thanks to the **rubber edged** cable entry module, movable for 0-50 mm and with sliding compression system, incoming cables are compressed safely whereas dust is reduced inside at maximum levels.

## BRACKET TYPE REAR DOOR

Rear door model for standard wall type cabinets is of bracket type.

As the bracket type rear door model is used as the installation carcass for wall mounting applications, it may be easily fixed to the wall.

After fixing the rear door to the wall, cabinet is fixed to the wall by being hooked onto the rear door.

Bracket type rear door has a mechanically lockable structure by being fixed to the lower chassis by means of a screw via 2 installation holes found at the top and bottom.
